

The Ramsar Convention is an international treaty which was developed to conserve wetland habitats and to promote wise use of their resources. The treaty was adopted on 2nd February 1971 in the Iranian city of Ramsar. As of August 2008, 158 nations have signed the agreement. Globally 1759 wetland sites, totalling 161 million hectares have been identified for conservation. India signed the agreement in 1981 and as of August 2008, 25 wetland sites have been identified in India as sites of international significance.
